

Color Dominoes

Items used to make this Project:

- CD-168010 Colors: Photographic Shape Stickers
- CD-3912 Create-Your-Own Flash Cards
- Ruler
- Marker or pen

Directions: Lay several blank flash cards horizontally on a flat surface; measure to find the middle and mark each card. Make a vertical line from top to bottom like a traditional domino. Using the marked side, put one sticker on the left side of the card and one on the right. The next card should have a sticker that matches one end of the previous card and an additional picture. Continue this method until all the cards have stickers that match at least one other card. Children will play this game like Dominoes.
