

# Schoolhouse Game Board

make & take!

## Items used to make this Project:

- DJ-610010 Schoolhouse Bulletin Board Set
- Construction paper
- Tape or glue

**Directions:** Lay the construction paper horizontally on a flat surface. Cut out the tree and label it "START." Place it near the top left of the paper. Cut out the schoolhouse and label it "FINISH." Place this piece at the bottom right of the paper. Cut out the header and glue or tape it to the top of the construction paper. Cut out the sun and secure it at the top of the paper. Cut out the boy and girl bear figures to use as game pieces. Next, cut out the apples and the two sections of fence. Make a trail of apples from the tree to the schoolhouse, gluing or taping as you go. Use the fence pieces glued or taped next to each other to make a bridge connecting the apple trail somewhere in the middle of the construction paper. The game board is generic so have fun making up the games to play on it.
